Freelance Design/Development
(2013 - Current)

University of Texas Arlington, Arlington TX

Contract position to audit and fix accessibility issues across the universities portfolio of websites. Responsible for migrating old websites to new themes, fixing broken theme issues, improving SiteImprove score to acceptable standards.

Cencora (AmerisourceBergen), Carrollton TX

Started my career here as a UX Developer. I was responsible for turning business requirements into interactive prototypes that would be the front end piece of our software. I eventually moved to doing full stack development as an applications developer and E2E automated testing. Worked in a SAFe environment and contributed to my teams development and project management.

Highland Homes, Plano TX

Designed and developed Interactive Sales Kiosks for model homes. Redesigned and restructured work on main company website. Created an overall more engaging user experience on the web

E4 Health Inc, Irving TX

Designed, developed, and managed the corporate website. researched and managed content for EAP websites within our network. General CMS web management and updates

Maxor National Pharmacy, Amarillo TX

Designed and developed the front end for a series of online pharmacies who used our services. assisted with the creation of new corporate web platforms and technology

Cornfed Web Designs

Freelance design of marketing materials for web and print. I also do web development and branding for companies. Video Editing, Social Media Marketing, General Marketing, and Merch creation for several Dallas Texas based companies and non-profit organizations.
